

TABLE OF CONTENTS

EXECUTIVE SUMMARY

CHAPTERS

1	<i>INTRODUCTION</i>	1
1.	What is the purpose of an Environmental Impact Statement?.....	1
2.	What is the NEPA EIS process and how does it relate to Figure “8” HOA’s proposed project?.....	2
3.	How has the public been involved?	3
4.	How have government agencies been involved?	5
5.	What is the Figure Eight Island Shoreline Management Project and where is it located?	5
6.	What issues were identified as part of scoping?	9
7.	What laws are involved?.....	10
2.	<i>PURPOSE & NEED</i>	15
1.	What are the purpose and needs of this project?.....	15
2.	How is the Figure Eight Island shoreline managed today?.....	15
3.	<i>PROJECT ALTERNATIVES</i>	25
1.	What alternatives are evaluated in this EIS?.....	25
Alternative 1- No Action	25	
Alternative 2- Abandon/Retreat.....	28	
Alternative 3- Rich Inlet Management with Beach Fill.....	29	
Alternative 4- Beach Nourishment without Inlet Management.....	42	
Alternative 5A- Terminal Groin with Beach Fill from Maintenance of the Nixon	48	
Channel and Connector Channel		
Alternative 5B- Terminal Groin with Beach Fill from Other Sources	62	
4	<i>AFFECTED ENVIRONMENT</i>	68
1.	What is the environmental setting of this project?.....	68
2.	What are the characteristics of the various habitats found within the project area?	72
Estuarine Habitats	72	
Saltmarsh Communities		
Submerged Aquatic Vegetation		
Shellfish		
Upland Hammock	92	
Inlet Dunes and Dry Beach Habitat	93	
Overwash Habitats		
Intertidal Flats and Shoals.....	95	
Oceanfront Dry Beach and Dune Habitats.....	96	
Oceanfront Dune Communities		
Oceanfront Dry Beach Communities		
Wet Beach Communities	98	

Figure Eight Island Shoreline Protection Project EIS

Benthic Infaunal Communities	
Marine Habitats.....	100
Softbottom (Unconsolidated) Communities	
Hardbottom (Consolidated Sediment) Communities	
Water Column.....	105
Hydrodynamics and Salinity	
Larval Transport	
3. What are the characteristics of the threatened, endangered, and State listed species found within the project area?.....	107
Reptiles	108
Mammals.....	125
Fish.....	127
Plants.....	129
Birds.....	140
4. What are the public interest factors within the project area?.....	149
Public Safety	
Aesthetic Resources	
Recreational Resources	
Navigation	
Socio-Economic Resources	
Land Use	
Infrastructure	
Solid Waste	
Drinking Water	
Noise Pollution	
Water Quality	
Turbidity and TSS	
Nutrients	
Non-relevant Resources	
5. How would cultural resources be affected by the project?	160
5 <i>ENVIRONMENTAL CONSEQUENCES</i>	161
1. What are the alternatives eliminated from further consideration?.....	161
2. How were the environmental impacts analyzed?.....	164
3. What impact would each alternative have on the shorelines of Figure Eight Island and Hutaff Island over a 5-year period?.....	168
4. What other projects occurring or being implemented within the vicinity of Figure Eight Island may cumulatively affect this project?.....	194
5. What are the general environmental impacts associated with the project?	195
6. What are the environmental and economic impacts associated with each specific alternatives?	200
6 <i>AVOIDANCE AND MINIMIZATION</i>	293
1. How will construction practices avoid and minimize environmental impacts?	293
2. What are the monitoring initiatives being developed?	296
3. How does the construction of the terminal groin relate to SB 110?	343

Figure Eight Island Shoreline Protection Project EIS

LIST OF FIGURES

1.1 – Figure Eight Island Inlet and Shoreline Management Project Location Map	8
2.1 – Southeasterly Orientation of the Main Channel within Rich Inlet as of November 1993.....	17
2.2 – Northeasterly Orientation of the Main Channel within Rich Inlet as of March 1999	18
2.3 – North End of Figure Eight Island after Nourishment Event in 2001	21
2.4 – Evidence of Rapid Erosion Approximately One Month Following 2001 Nourishment	21
2.5 – Diagram Depicting Imminently Threatened Structures	22
2.6 – Location of Imminently Threatened Residential Structures on Figure Eight Island	24
3.1 – Borrow area in Nixon Channel	27
3.2 – Map depicting the two different cuts designed for the Alternative 3 channel corridor	29
3.3 – Map depicting the locations of sand samples collected on Figure Eight and Huttaff Island	34
3.4a – Alternative 3: Optimal channel design, closure dike, and northern portion of beach fill	37
3.4b – Alternative 3: Southern portion of beach fill	38
3.5 – Alternative 3 – Cumulative channel shoal volumes over the 5 year model simulation.....	40
3.6 – Potential offshore borrow areas identified by Dr. Cleary	44
3.7 – Location of AIWW dredged material disposal sites 1, 2, and 3	45
3.8 – Terminal Groin Layout Based on 1970 and 1998 Shorelines.....	49
3.9 – Alternative 5A, Terminal Groin with Beach Fill from New and Previously Dredged Cuts in Nixon Channel.....	51
3.10 – Profile of terminal groin.....	53
3.11 – Typical terminal groin cross-section 1.....	54
3.12 – Typical terminal groin cross-section 2.....	55
3.13a – Plan view of Alternative 5A.....	58
3.13b – Plan view of Alternative 5A	59
3.14 – Footprint of the terminal groin, construction corridor, and offloading pier	60
3.15 – Alternative 5B dredging and Groin Option and Beach Fill Layout.....	65
4.1 – Figure Eight Island Environmental Setting Map within the Permit Area.....	70
4.2 – Schematic depicting various habitats associated with a barrier island	72
4.3 – Potential Submerged Aquatic Vegetation (SAV) Locations	78
4.4a – Identified SAV Resources within the Permit Area	79
4.4b – Identified SAV Resources within the Permit Area	80
4.5 – Oyster Management Areas within and in proximity to the Permit Area	82
4.6 – NCDMF Shellfish Mapping Program – Area SO36.....	84
4.7 – MCDMF Shellfish Mapping Program – Area SO46	85
4.8 – Identified Shellfish Resources within the Permit Area.....	89
4.9 – Identified Shellfish Resources within the Permit Area.....	90
4.10 – Map depicting sidescan sonar survey area.....	104
4.11 – 2001 Loggerhead sea turtle nests within the Permit Area	115
4.12 – 2002 Loggerhead sea turtle nests within the Permit Area	116
4.13 – 2003 Loggerhead sea turtle nests within the Permit Area	117
4.14 – 2004 Loggerhead sea turtle nests within the Permit Area	118

Figure Eight Island Shoreline Protection Project EIS

4.15 – 2005 Loggerhead sea turtle nests within the Permit Area	119
4.16 – 2006 Loggerhead sea turtle nests within the Permit Area	120
4.17 – 2007 Loggerhead sea turtle nests within the Permit Area	121
4.18 – 2008 Loggerhead Sea Turtle Nests within the Permit Area	122
4.19 – 2009 Loggerhead Sea Turtle Nests within the Permit Area	123
4.20 – 2010 Loggerhead Sea Turtle Nests within the Permit Area	124
4.21 – 2002 Seabeach amaranth distribution within the Permit Area.....	131
4.22 – 2003 Seabeach amaranth distribution within the Permit Area.....	132
4.23 – 2004 Seabeach amaranth distribution within the Permit Area.....	133
4.24 – 2005 Seabeach amaranth distribution within the Permit Area.....	134
4.25 – 2006 Seabeach amaranth distribution within the Permit Area.....	135
4.26 – 2007 Seabeach amaranth distribution within the Permit Area.....	136
4.27 – 2008 Seabeach amaranth distribution within the Permit Area.....	137
4.28 – 2009 Seabeach amaranth distribution within the Permit Area.....	138
4.29 – 2010 Seabeach amaranth distribution within the Permit Area.....	139
4.30 – NC DENR Shellfish Sanitation Map of Shellfish Closures.....	155
4.31 – NC DENR Shellfish Sanitation Map of Shellfish Closures.....	156
4.32 – CPE-NC Water Quality Monitoring Sites.....	158
5.1 – Island segments used for model volume change computations	169
5.2 – Alternative 2 – Year 0.....	171
5.3 – Alternative 2 – Year 1.....	171
5.4 – Alternative 2 – Year 2.....	172
5.5 – Alternative 2 – Year 3.....	172
5.6 – Alternative 2 – Year 4.....	173
5.7 – Alternative 2 – Year 5.....	173
5.8 – Alternative 3 – Year 0: Post-Construction.....	175
5.9 – Alternative 3 – Year 1 after construction with dike installed	176
5.10 – Alternative 3 – Year 2 after construction.....	176
5.11 – Alternative 3 – Year 3 after construction.....	177
5.12 – Alternative 3 – Year 4 after construction.....	177
5.13 – Alternative 3 – Year 5 after construction.....	178
5.14 – Alternative 4 – Year 0: Post-construction.....	181
5.15 – Alternative 4 – Year 1 after construction.....	181
5.16 – Alternative 4 – Year 2 after construction.....	182
5.17 – Alternative 4 – Year 3 after construction.....	182
5.18 – Alternative 4 – Year 4 after construction.....	183
5.19 – Alternative 4 – Year 5 after construction.....	183
5.20 – Alternative 5A – Initial post-construction condition	188
5.21 – Alternative 5A – After one (1) year.....	188
5.22 – Alternative 5A – After two (2) years	189
5.23 – Alternative 5A – After three (3) years	189
5.24 – Alternative 5A – After four (4) years	190
5.25 – Alternative 5A – After five (5) years	190
5.26 – Modeled shoaling volumes within discrete areas within the Permit Area under Alternative 2.....	217
5.27 – Map depicting the upland disposal area.....	226

Figure Eight Island Shoreline Protection Project EIS

5.28 – Year 5 topography and bathymetry of the northeastern portion of Figure Eight Island	231
5.29 – Year 5 topography and bathymetry of the southwestern portion of Hutaff Island	231
5.30 – Modeled volume changes within discrete areas within the Permit Area for Alternative 3	233
5.31 – Alternative 3 – Cumulative channel shoal volumes over the 5-year model simulation	243
5.32 – Year 5 topography and bathymetry of the northeastern portion of Figure Eight Island	262
5.33 – Year 5 topography and bathymetry of the southwestern portion of Hutaff Island	263
5.34 – Alternative 5A modeled shoaling volumes within discrete areas within the Permit Area	265
6.1 – Rich Inlet Habitat Mapping Boundary.....	300
6.2 – Shoreline transects	305
6.3 – Cumulative shoreline changes between 1938 and 2007 for transect groups Figure Eight	306
6.4 – Cumulative shoreline changes between 1938 and 2007 for transect groups Hutaff Island	307
6.5 – Figure Eight Island 1938 – 2007 average shoreline change for transects 1-5	308
6.6 – Figure Eight Island average shoreline change for transects 6-9	309
6.7 – Figure Eight Island average shoreline change for transects 10-11	309
6.8 – Figure Eight Island average shoreline change for transects 12-13	310
6.9 – Figure Eight Island average shoreline change for transects 14-15	311
6.10 – Figure Eight Island shoreline change for transects 16-19.....	312
6.11 – Figure Eight Island shoreline change for transect 20.....	312
6.12 – Hutaff Island average shoreline change for transects 21 to 25	313
6.13 – Hutaff Island average shoreline change for transects 26 to 30	314
6.14 – Hutaff Island average shoreline change for transects 31 to 35	315
6.15 – Hutaff Island shoreline change for transects 36 to 41.....	316
6.16 – Transect Group T1-T5, Figure Eight Island	319
6.17 – Transect Group T6-T9, Figure Eight Island	320
6.18 – Transect Group T10-T11, Figure Eight Island	321
6.19 – Transect Group T12-T13, Figure Eight Island	322
6.20 – Transect Group T14-T15, Figure Eight Island	323
6.21 – Transect Group T16-T19, Figure Eight Island	324
6.22 – Transect Group T20, Figure Eight Island	325
6.23 – Transect Group T21-T25, Hutaff Island	325
6.24 – Transect Group T26-T30, Hutaff Island	326
6.25 – Transect Group T31-T35, Hutaff Island	326
6.26 – Transect Group T36-T41, Hutaff Island	327

LIST OF TABLES

1.1 – Figure Eight Island Inlet and Shoreline Management Project PDT Members	4
2.1 – Shoreline Protection Project History on Figure Eight Island.....	20
2.2 – Analysis of Threatened Structures on Figure Eight Island	23
3.2 – Characteristics of the Native Beach and Rich Inlet Channel Material	36
3.3 – Estimated cumulative shoal volumes in each channel over the 5 year simulation for Alternative 3.....	39
3.4 – Alternative 4 beach fill placement volumes and design berm widths	42
3.5 – Characteristics of the AIWW Dredged Material Disposal Areas near Nixon Creek.....	46
3.6 – Alternative 5A beach fill placement volumes and design berm widths.....	52
3.7 – Alternative 5B beach fill placement volumes and design berm widths.....	64

Figure Eight Island Shoreline Protection Project EIS

3.8 – Summary of Average Annual Economic Impact of Alternatives	67
3.9 – Summary of 30 year Implementation Costs of Alternatives.....	67
4.1 – Spawning Seasons for Shellfish.....	83
4.2 – Shellfish Density Data for Area SO36.....	86
4.3 – Shellfish Density Data for Area SO46.....	87
4.4 – Temporal presence and major recruitment periods of surf zone invertebrates of the South Atlantic Bight	100
4.5 – Federal and State Listed Species Found or Have the Potential to be Found within the Permit Area	108
4.6 – Number of Loggerhead Sea Turtle Nests Documented in defined Permit Area.....	114
4.7 – Figure Eight Island and NCAS annual Seabeach amaranth data.....	130
4.8 – Piping Plover Survey Data for Figure Eight Island	142
4.9 – Wilson's Plover Survey Data Observed 2000 – 2007	145
4.10 – American Oystercatcher Survey Data Observed 2000-2007	145
4.11 – Number of Common Tern Nests Observed 1977 – 2007	146
4.12 – Number of Gull-Billed Tern Nests Observed 1977 – 2007	147
4.13 – Number of Black Skimmer Nests Observed 1977 – 2007	148
5.1 – Area of various habitats that is expected to be affected by project alternatives over a five-year period.....	167
5.2 – Figure Eight Island Beach Segments	168
5.3 – Average annual rate of volume change.....	179
5.4 – Percent of Alternative 4 initial beach fill volume remaining after each year of the 5-year Delft3D model simulation.....	179
5.5 – Alternative 4 Oceanfront Beach Fill Placement Volumes and Design Berm Widths	184
5.6 – Percent of Alternative 5A initial beach fill volume remaining after each year of the 5-year Delft3D model simulation	186
5.7 – Average annual rate of volume change Alternatives 2, 3 and 5A	186
5.8 – Average annual rate of volume change Alternatives 2, 3, 5A and 5B	192
5.9 – Figure Eight Island's Historical Beach Nourishment on the North End	201
5.10 – Summary of Average Annual Economic Impact of Alternative 1 Over a 30 Year Period....	214
5.11 – Average annual rate of volume change Alternative 2.....	219
5.12 – Summary of Average Annual Economic Impact of Alternative 2.....	224
5.13 – Summary of Average Annual Economic Impact of Alternative 3.....	245
5.14 – Summary of Average Annual Economic Impact of Alternative 4.....	257
5.15 – Summary of Average Annual Economic Impact of Alternative 5A.....	277
5.16 – Summary of Average Annual Economic Impact of Alternative 5B	292
6.1 – Characteristics of the Native Beach and Borrow Area Material.....	295
6.2 – Summary of shoreline changes on Figure Eight Island and Hutaff Island	317
6.3 – 90% Confidence intervals for the 1974-2007 linear regression shoreline change rates for each transect group on Figure Eight Island and Hutaff Island.....	318
